 on rail or cable.

Crosswise installation possible with special hanging system.

CROP MAKER

Crop maker, a greenhouse light which has an extremely good 89% efficiency ratio.

The heavy ventilated body is made of powder painted electroplated steel.

Reflector; made of the best possible aluminium: hammered MIRO 9 which surface is very bright, smooth and hard because of the anodizing and the metallization.

No tools needed to remove or reinstall the reflector.
